Describe the content knowledge/concepts assessed:

Concepts: Spatial thinking, human-environment interaction,

interconnectedness

List the skills/performance assessed:

learning to use geography's tools and analytical concepts; ask geographic questions; acquire information from primary and secondary source; skills in observation and speculation; analyze, synthesize, and evaluate geographic information; develop and test generalizations

Item Types - check all that apply (note: there is often overlap among certain item types):

Selected Response (multiple choice, true-false, matching, etc.) **Short Answer** (short constructed response, fill in a graphic organizer or diagram, explain your thinking or solution, make and complete a table, etc.)

Extended Response (essay, multi-step response with explanation and rationale required for tasks)

Product (research paper, editorial, log, journal, play, poem, model, multimedia, art products, script, musical score, portfolio pieces, etc.)

Performance (demonstration, presentation, science lab, dance or music performance, athletic performance, debate, etc.)

Process (creation, development, design, exploration, imagining, visualization, experimentation, invention, revision)

The assessment includes:

Teacher directions (may include prerequisites/description of instruction before giving the assessment e.g., this assessment should be given after students have learned ...)
