

**Advanced – Performance Level 4 (Score range: 614 to 860)**

Students apply equivalent representations of decimals, fractions, percents; apply congruency to multiple polygons, use fractional parts of geometric figures; identify nonequivalent fractional parts of a whole; translate algebraic expressions, equations into words; analyze, extend nonlinear patterns; analyze bar, circle graphs; construct histograms; reason about parallel, perpendicular lines; determine coordinates of points on grids; find circumference, radius of circles; transform geometric shapes; solve problems involving area, volume, compute with fractions; use correct order of operations.

**Proficient – Performance Level 3 (Score range: 559 to 613)**

Students represent equivalent fractions; estimate sums with decimals; determine, simplify ratios; determine lowest common multiple; determine, analyze, extend numeric, geometric patterns; determine median, mode, range; complete frequency table; determine, express probabilities as fraction, decimal, percent; plot ordered pairs on grid; read line graphs, determine scales; add, subtract decimals multiply two-digit whole numbers; scale up fractions; identify fractional parts of a whole.

**Partially Proficient – Performance Level 2 (Score range: 487 to 558)**

Students translate words to algebraic equations; analyze, extend geometric patterns; draw conclusions from line graphs; analyze data to predict outcomes; measure distance and apply scale on maps; compute with whole numbers.

**Unsatisfactory – Performance Level 1 (Score range: 280 to 486)**

Students read and write whole numbers; read and interpret line and circle graphs, visualize three dimensional models, use exponents to indicate the number of times a base is used.
